Foot & Ankle Solutions

Product Portfolio

The information presented in this brochure is intended to demonstrate a Stryker product. Always refer to the package insert, product label and/or user instructions before using any Stryker product. Surgeons must always rely on their own clinical judgment when deciding which products and techniques to use with their patients. Products may not be available in all markets. Product availability is subject to the regulatory or medical practices that govern individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Foot & Ankle

Introduction

Trauma and deformity correction surgeries involving the foot and ankle require precision without compromise. The most important thing that Stryker Osteosynthesis offers to surgeons is the power to make a difference for the benefit of their patients. Our **Foot and Ankle Solutions** present a variety of targeted implant technologies, specifically engineered to meet the stringent demands of this challenging field of orthopaedics.

In addition to Foot & Ankle products Stryker Osteosynthesis offers solutions for the following indications:

- Upper Extremities & Hand
- Hip Fracture
- Lower Extremities & Pelvis
- Pediatrics
- Deformities
